Full Stack / AI Engineer with 4+ years of experience in enterprise grade web applications and GenAI powered tech stacks.

Work Experience

Tiger Analytics Inc

Sep 2022 - present

Agentflow (Agent Building platform)

- Contributed to the development of a **dynamic agent orchestration platform** using **React, FastAPI, and PostgreSQL**, incorporating **React Flow** to enable **canvas-based** creation of **LangGraph agents**.
- Developed and integrated an autonomous **copilot** for **Agentflow** using the **LangGraph Deep Agent** stack, spanning the interactive Canvas, Playground testing suite, and Tool & Connector registration modules.
- Designed custom **Dynamic Tool Middleware** and modular **Skills** to lazily bind **skill-associated tools**, reducing **context token** overhead and **execution latency**.
- Architected a **hybrid search engine** in **PostgreSQL** using **pgvector** and **SQLAlchemy CTEs**, combining **cosine similarity** with **exact full-text search (ts_rank)** to enable robust, natural language **discovery of platform tools.**

GabAI (Bangko Sentral ng Pilipinas)

- Engineered an end-to-end **GenAI chatbot** using **React, FastAPI, and LangGraph** agents, integrating **MongoDB** for data persistence and **MSAL** for enterprise-grade Single Sign-On (SSO).
- Architected a scalable solution with **asynchronous REST APIs** and **tokenized WebSocket streaming** to minimize latency, while enabling seamless file upload capabilities via **Azure Blob Storage**.
- Orchestrated containerized deployments by **Dockerizing** services and managing images in **Azure Container Registry**, and established robust **CI/CD** pipelines using **GitHub Actions** to automate deployments.

GCash WealthCoach AI

- Developed a **responsive micro-frontend** chat web app within a native container using **Vue 3 and TypeScript.**
- Maximized application performance and reduced network load by implementing **Vue Query (TanStack Query)** for efficient **API caching** and **state management**, alongside **component-level lazy loading**.
- Fortified data security by developing **custom HTTP middleware** that leverages **Native JS Bridges** to **encrypt request payloads** before transmission.

MARS - AKS Migration POC

- Assisted in migration of a web application from **Azure App Service** to **Azure Kubernetes Service (AKS),** utilizing the **KEDA HTTP Add-on** to achieve "**scale-to-zero**" capabilities, significantly reducing idle resource costs.
- Authored comprehensive Kubernetes **manifests (Deployments, Services)** for frontend, backend, and containerized Azure Functions, and **configured Ingress controllers** for secure traffic management.

MARS - Support Portal

- Built a responsive **CMS-based frontend** using **React** and **TypeScript**, integrating **MSAL SSO** authentication with **JWT-based authorization** and **protected user/admin** routes.

Skills

Languages: Python, Javascript, TypeScript, HTML & CSS

Frameworks: React, FastAPI, Vue, LangGraph, Deep Agents

Cloud/Tools: GitHub, Azure DevOps, Azure Resources, Docker, Kubernetes

Education

BMS College of Engineering(2022)

Electronics and Telecommunication
